Welcome to Github Jobs - Challenge

If you have any questions, don't hesitate to ask. Here are 7 general steps to complete the challenge:

- **Step 1:** Create a new repository on github
- **Step 2:** Copy resources, README.md & jobs.json to your repository
- **Step 3:** Try to follow the proposed design
- **Step 4:** Complete all user stories
- **Step 5:** Update README.md
- **Step 6:** Deploy your app and submit your solution
- **Step 7:** Share your solution

Challenge:
- Create a job search using an API.
- Use javascript to create dynamic tags.
- Don't look at the existing solution.
- Fulfill user stories below:

User story: I can see a list of jobs by default
User story: I can search for jobs with a given keyword
User story: I can search for jobs with a given technology
User story: I can search for a full-time job only
User story: I can see a list of jobs with their logo, company name, location, and posted time.
User story (optional): I can see jobs on different pages, 5 items on each page
